

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A repository, for a plurality of objects, comprising:  
a body for supporting simultaneously a plurality of objects including a mobile phone and at least one other object;  
wireless communication means for communicating with at least one of the plurality of objects to transfer data therefrom; and  
a user interface responsive to the wireless communication means for providing information to a user received in the transferred data.
2. (Original) A repository as claimed in claim 1, wherein the wireless communication means is arranged to detect proximal objects by communication therewith.
3. (Original) A repository as claimed in claim 2, wherein the wireless communication means comprises a LPRF transceiver.
4. (Original) A repository as claimed in claim 2, wherein the wireless communication means comprises an RFID detector.
5. (Original) A repository as claimed in claim 1, wherein the wireless communication means transfers data from an object.
6. (Original) A repository as claimed in claim 5, wherein the wireless communication means comprises a LPRF transceiver.
7. (Original) A repository as claimed in claim 1, wherein the wireless communication means comprises a LPRF transceiver for detecting proximal objects by communication therewith and for transferring data from a proximal object.

8. (Original) A repository as claimed in claim 7, further comprising a memory; and a processor for controlling a display of the user interface to display the transferred data.

9. (Original) A repository as claimed in claim 1 in the form of a shelf.

10. (Original) A repository according to claim 1, having a substantially planer support surface.

11. (Currently Amended) ~~A repository according to claim 1~~ A repository, for a plurality of objects, comprising:

a body for supporting simultaneously a plurality of objects including a mobile phone and at least one other object;

wireless communication means for communicating with at least one of the plurality of objects to transfer data therefrom; and

a user interface responsive to the wireless communication means for providing information to a user received in the transferred data;

said repository comprising a display for displaying information received from the mobile phone.

12. (Original) A repository as claimed in claim 1, wherein the wireless communication means identifies an object that has been removed from the repository.

13. (Original) A repository as claimed in claim 12, further comprising a processor responsive to the communication means for activating an alert in the user interface.

14. (Original) A repository as claimed in claim 13, wherein the processor is arranged to activate the alert when a first object has been removed from the repository but a second object has not been removed.

15. (Original) A repository as claimed in claim 13, wherein the processor is arranged to

Appl. No. 10/608,173

Amdt. Dated March 16, 2005

Reply to Office Action of December 16, 2005

activate the alert in dependence upon data transferred via the communication means to the repository and the removal of a first object from the repository.

16. (Original) A repository comprising: a body having a support surface for supporting simultaneously a plurality of objects including a mobile telephone and at least one other object, and charging circuitry, within the body, for recharging a mobile telephone.
